

Intuition and Lessons Integration

Convolvulus – English Blue

Developing intuitive abilities and gathering wisdom

The flower essence for helping in the process of fine-tuning one’s intuitive processes, and in the broad field of facilitating the wisdom-gathering from the experiences of living life’s lessons and challenges.

Not to be confused with the duality-based learning of karmic experience, which is different.

This is about a type of learning that is non-dualistic, being able to just “know” things, without having to go through the drama of the karmic-type battles.

Affirmation: “I develop and fine-tune my intuitive abilities.”
