

# Cultural and Social Issues

---

## Mexican Thorn Tree

### **The essence for social and cultural issues**

This includes all examples of this type of issue, including, for example, issues of discrimination for any social or cultural-type reason, especially for people who feel that they are the victims of such discrimination or persecution.

In common with the other flower remedies of this series, this essence helps a person in the process of realizing that the effects of the perceived “wrong” that has been done to them only actually affects them to the extent that they buy into their own belief that such things can have power over them.

This essence therefore helps people to realize that this perceived power over them is illusory, and only appears to be real because they are creating this themselves.

**Affirmation: “I now fully realize that I am the only person who has any real power over me.”**
